an operation unit to allow the user to specify web page information to be outputted next, wherein

the control unit informs address information corresponding to the specified web page information by the operation unit to the browser unit.

4.   (TWICE AMENDED) The slide show system according to claim 3, wherein the operation unit specifies one of the web page information pieces before and after web page information currently being outputted as the web page information to be outputted next.

5.   (TWICE AMENDED) The slide show system according to claim 17, wherein the control unit informs the plurality of pieces of address information to the browser unit according to the output sequence.

7.   (TWICE AMENDED) The slide show system according to claim 6, wherein the control unit changes the time intervals according to each of the plurality of sequence numbers.

8.   (TWICE AMENDED) The slide show system according to claim 17, further comprising:

a sound output unit to output sound information including at least one of music and a narration, wherein

the control unit instructs the sound output unit to output the sound information.

10.   (TWICE AMENDED) The slide show system according to claim 17, wherein the browser unit obtains web page information via a communication network using address information informed by the control unit.

11.   (TWICE AMENDED) The slide show system according to claim 17, further comprising:

a storage unit to store web page information to be outputted corresponding to address information, wherein

the browser unit obtains web page information which is stored in the storage unit using address information informed by the control unit.

2

12.   (TWICE AMENDED) A computer-readable storage medium which stores a program for causing a computer to perform:

incrementing a control variable indicating one of a plurality of sequence numbers of a predetermined output sequence that is specified by a user;

referring to a correspondence relationship between a plurality of pieces of address information defined on an information network for web page information and the sequence numbers to obtain address information corresponding to a sequence number indicated by the variable; and

informing the obtained address information to a browser, and instructing output of web page information corresponding to the informed address information.

13.   (TWICE AMENDED) A computer-readable storage medium which stores a program for causing a computer to perform:

incrementing a control variable indicating one of a plurality of sequence numbers of a predetermined output sequence that is specified by a user;

referring to a correspondence relationship between a plurality of pieces of address information defined on an information network for web page information and the sequence numbers to obtain address information corresponding to a sequence number indicated by the variable;

obtaining web page information using the obtained address information; and

outputting the obtained web page information.

14.   (TWICE AMENDED) A slide show method comprising:

preparing a correspondence relationship between a plurality of pieces of address information defined on an information network for web page information and a plurality of sequence numbers of a predetermined output sequence that is specified by a user;

incrementing a control variable indicating one of the sequence numbers;

obtaining address information corresponding to a sequence number indicated by the variable with reference to the correspondence relationship;

obtaining web page information using the obtained address information; and

presenting the obtained web page information.
